

3M™ Marine Adhesive Sealant Solutions For Boat Building and Repair

Come sun,
wind or
high water

3M™ OEM Polyurethane Glass Adhesive Sealant 590

- A fast-curing, one-component, high viscosity polyurethane sealant that forms a strong yet elastic, permanent bond
- Ideal for structural glass bonding, such as windshields and port windows
- Bonds to a wide variety of materials, including glass, acrylic, PMMA and polycarbonate
- 30-minute skin time, 3-hour handling strength

3M™ All Purpose Sealant Primer P591

- Promotes bonding and increases adhesion of polyurethane adhesive sealants
- Applied to a wide variety of materials—prior to application of adhesive sealants

The toughest sealants on the sea

Whether you're bonding trim, toe rails, fittings or fiberglass deck components, or sealing thru-hulls, hatches, hinges, trunk joints or almost anything else on a marine vessel, 3M has an adhesive sealant that's proven to the task. Our products have set the standard for marine excellence for more than 50 years, and they now include a new generation of advanced polyurethane and silane-modified polymers (SMPs) that further expand their range and effectiveness.

3M™ Marine Adhesive Sealants are specifically designed for the rigors of the marine environment, bonding or sealing everything from wood, metal and glass to gelcoat and most plastics—including fiber-reinforced plastic (FRP). Boaters have no better friend on the water.

3M™ Marine Grade Silicone Sealant

- A high quality silicone sealant designed specifically to withstand the rigors of harsh marine environments
- Forms a non-yellowing seal that remains flexible even after years of exposure
- Mildew resistant, non-sagging and moisture curing
- Adheres to bare and painted metal, fiberglass, glass, non-oily woods, and many plastics and abraded rubbers

3M™ Marine Adhesive Sealant 3000 UV

- A single-component, elastomeric sealant that cures without isocyanates
- Excellent cosmetic sealant; will not degrade when exposed to UV
- Low VOC, 50-minute skin time, paintable when wet
- Ideal for port hole and general cosmetic seam sealing

3M™ Marine Adhesive Sealant Fast Cure 4000 UV

- A high performance, color-stable adhesive sealant that can be removed if rework or repair is necessary
- Flexibility helps dissipate stress caused by shock, vibration, swelling or shrinking
- Ideal for installing thru-hull fittings and deck hardware where a durable seal is required and where cosmetics are important, both above and below the waterline

3M™ Marine Adhesive Sealant Fast Cure 4200

- Medium-strength adhesive allows for disassembly of parts after prolonged use
- Forms watertight, weather-resistant seals on hardware and in joints both above and below the waterline

3M™ Marine Adhesive Sealant 5200

- An exceptionally strong, high performance polyurethane
- Creates extremely strong bonds, above and below the waterline
- Maintains its flexibility, absorbing shocks, vibrations, swelling, shrinking and structural movements
- Tack free in 24-48 hours; cures in 5-7 days without shrinking
- Ideal for large surface-area applications requiring long open times

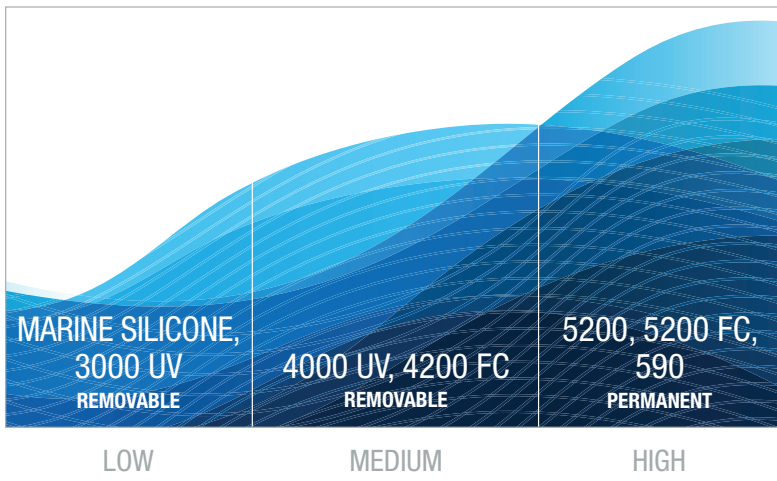

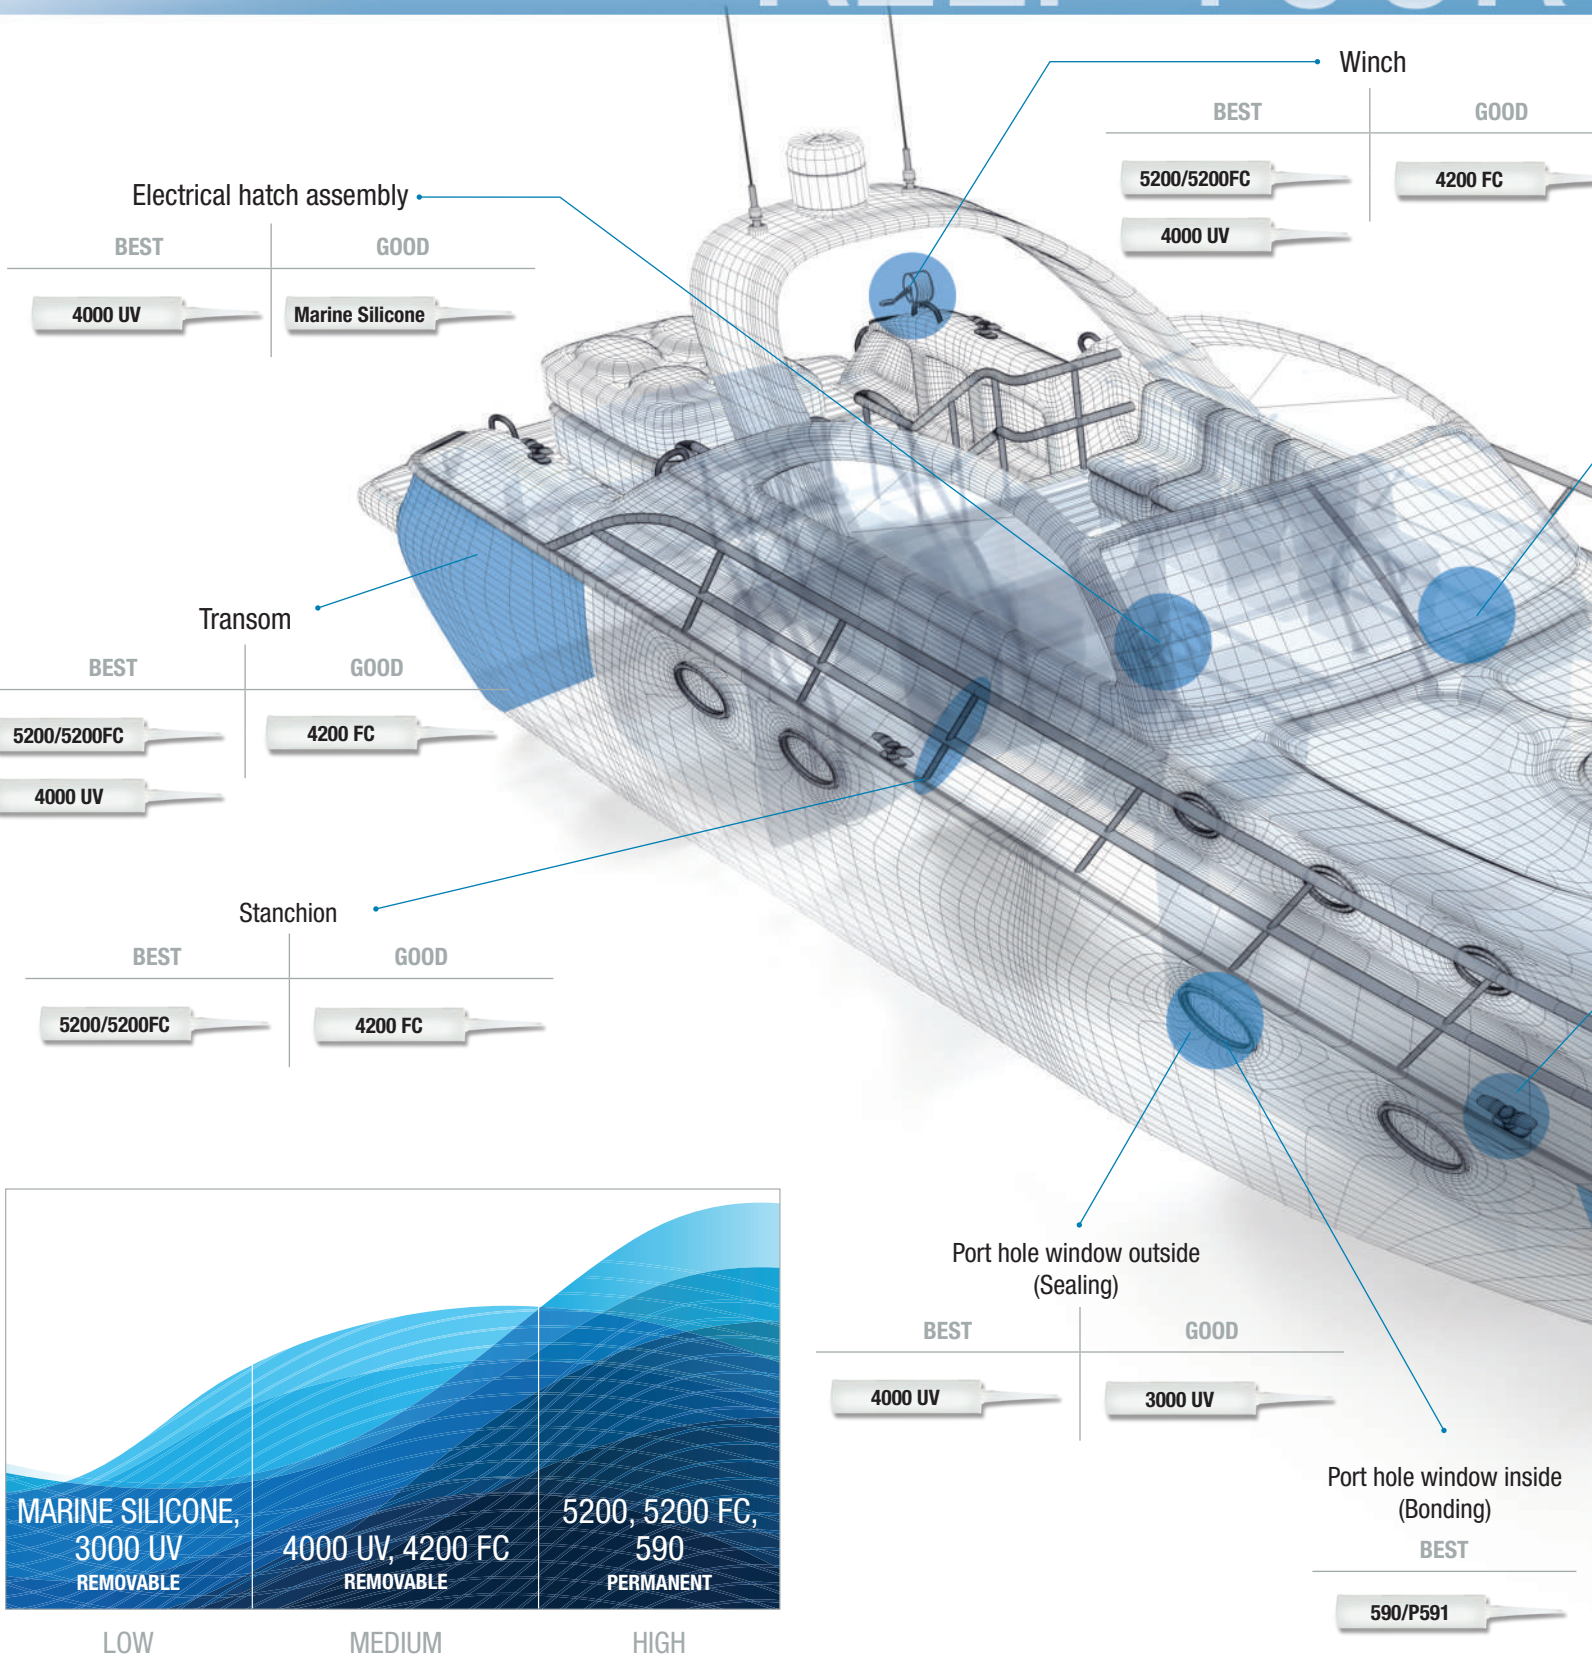

3M™ Marine Adhesive Sealant Fast Cure 5200

- Fast-cure version of 3M™ Marine Adhesive Sealant 5200
- Tack free in 1 hour; completely cures within 24 hours
- Ideal for applications requiring a fast, long-term seal, above or below waterline:
 - hull to deck seams
 - wood to fiberglass
 - marine hardware
 - hull and stern joints
