Powerful
200 watt
Heater

The AdTech PRO 200 is an affordable workhorse that's perfect for light-duty industrial applications such as packaging and product assembly. Contractors and DIYers will love its high-output for a wide range carpentry and remodeling projects. Its lightweight design and slim profile make it comfortable to use for extended periods. The PRO 200 features an ergonomic trigger for maximum grip and comfort, and requires substantially less trigger pressure than standard hot melt glue guns. At the core of the gun is a class-leading 200 watt PTC heating system which heats up in just six minutes, and operates at a preset temperature of 380°F (193°C).
